RECOMMENDED EQUIPMENT:

Ozonics Scent Eliminator: Highly recommended for those of you who are focused on scent control! Which should be everyone. ☺ This can be a game changer for your hunt! There are various models to choose from. If you’re doing all day sits it’s recommended that you get a second battery as one battery won’t last all day on a dark til dark sit.

Polygiene Base Layers: Great product that keeps odor from replicating. Although they last several days without washing depending on intensity of activity, we recommend several layers you can rotate and wear though the week. There are several companies that offer this Polygiene Technology but these are the most affordable.

100% Merino Wool Socks: Another great item to help control scent. Good socks are another component of scent control and being comfortable in the stand. I have sweated in these and your feet don't stink at the end of the day because bacteria can't replicate like it can on other cheaper hunting socks. Also keeps you warm even if they get wet.

Primos Trigger Gen 3 Tall Trigger Stick: Great way to stead your shot in a stand or blind. This shooting rest self-adjusts with a pull of a trigger. So it's ready instantly in the moment of truth. <https://www.primos.com/shooting-sticks/trigger-sticks-tri-pods/trigger-stick-gen3-tall-tripod-shooting-stick/PO-65815.html>

ONX Membership: Great App for your phone. It allows you to see property lines and allows us to share a pin of your stand location. Although most of our stands are obvious and easy to get to, this just makes life easier in some situations. Here is their website but you would want to go on your phone to download the app. <https://www.onxmaps.com/>
